

I am a strong believer in the Do Not call list. It is my right as an American to not be hassled or interrupted in my daily life. If the Governor of the State of Indiana and our legislative branches do not protect its people when they ask to be protected, then it is very obvious our Governor and its branches do not care about its people, but only about the corporate and global world. To do away with the do not call list is to do away with out constitutional rights of freedom of privacy. If this do not call list is done away with. Then it is time for me to change my vote in the next election for governor. And to campaign for a government that will protect its people and not the high priced contributors. I am happy with the do not call list.
